

Growers,

First off, thank you to everyone that came to our open house. We had a record attendance again this year with over 100 guests. We really appreciate your support and your business.

FIELD OBSERVATIONS ~ I have attached some info about problems I have been seeing in the fields. I am receiving a lot of questions regarding poor stalk quality and ear mold, along with fertility questions. Attached are some tech sheets with good info. to help explain some of what I have been seeing.

WEIGH WAGON ~ I want to remind everyone as we get into harvest, we have our weigh wagon and tester available to help get yield monitors set up if needed. Please do not hesitate to call and we will help however possible. Please give us a heads up when you would like us to be there.

CLIMATE FIELDVIEW ~ Also, for those of you who are new to Climate Fieldview or want to purchase Climate we are setting up as planted maps for growers to overlay your hybrid and soil type yield this week, and if you need any assistance setting up and mounting your iPads please let us know.

CHICKEN LITTER ~ In case you do not know, we have prices on chicken litter for fall application available, if you are interested please call.

OCT 20 EARLY PAY DEADLINE ~ Finally, the first pay date of **Oct 20** is rapidly approaching for Channel Seed. Please keep this in mind for the best prices on your seed for this year.

I hope each of you has a bountiful and safe harvest season.

Andy Muff
